Jeannie Gandham

Consultant

Jeannie Gandham is an executive project and program leader with more than 20 years of experience guiding complex healthcare infrastructure, digital transformation and organizational change.

She works with teams from early planning and business case development through delivery, activation, go live and stabilization. Her strength is turning ambitious visions into executable roadmaps, aligning diverse stakeholders and maintaining focus on the decisions that create forward momentum.

Jeannie is known for her inclusive, direct and outcomes focused leadership style, along with her ability to build the governance, capability and confidence organizations need to sustain results.
